26.7.03

Sir,

This letter confirms that between 23.7.03 and 27.7.03 Mr. Shekhar Dhawan (Instrument Engineer) of ICS Triplex ALLPORT, successfully carried out re-ranging of the Sangu Facilities Pipeline Low and Low Low alarm and trip set points at the Sangu Alpha Offshore Platform, as requested by the Operator SBED/ KBRBL. Further more he also carried out software access and change principle training with KBRBL National Staff as requested.

I would also like to add that Mr. Shekhar Dhawan showed himself to be very competent and methodical in carrying out his work and also has a fine manner in which he conducts himself. I found him to be very polite and conservative with excellent communicative skills. He is a credit to the company ICS Triplex.

Regards,

J.M.Forster.
