

**ALLPORT INTERNATIONAL OFFERS SOLUTIONS FOR HIGH PRESSURE/ HIGH TEMPERATURE APPLICATIONS IN ASSOCIATION ITS PARTNER M/s. LTS ENERGY , USA**

## **PRODUCTS**

***The only PED certified Clamp Connector and Compact Flange Manufactured in accordance to API 6A, meeting PR2 and Annex F requirements, PSL 3G gas test with zero leakage through 15M service.***

### **CLAMP CONNECTORS**

Connectors offer huge weight and space savings when compared to equivalent Standard ASME and API Flange systems used in process piping, pressure vessels and OEM equipment. Resulting in faster speed of assembly and upto 75% less bolt torque with no periodic re-tightening necessary. An ideal solution for easy installation, high integrity and lightweight sealing typically used for HP Topside Piping, Critical services in Petrochemical, Fertiliser and HP Pipelines

### **COMPACT FLANGES**

Compact Flanges offer huge weight and space savings (upto 1/5<sup>th</sup>) when compared to Standard ASME and API Flange systems used in process piping, pressure vessels and OEM equipment. Resulting in faster speed of assembly and upto 75% less bolt torque with no periodic re-tightening necessary. An ideal solution for easy installation, high integrity and lightweight sealing typically used for HP Topside Piping, Critical services in Petrochemical, Fertiliser and HP Pipelines

### **HIGH PRESSURE VALVES**

Compact Trunnion Mounted Ball, Choke, Check, Gate and Boarding valves based around high performance, Metal to Metal Sealing and Compact Flange design. Offer Dramatic space and weight savings are achieved over standard ASME B16.34, API Trunnion Mounted Ball Valve (Metal & Soft Seatec and Gate Valve (Slab and Expanding Gate) Check Valve (Metal Seated) Choke and Flow Control (Cage & Needle/Seat Trims)

### **CLOSURES**

Single, Twin Leadscrew, four Bolt and Subsea Closures "all Metal" Fire safe Gasket design in both horizontal and vertical configurations. Applications include both Deep and Ultra Deepwater applications through 12,000ft (3800m). All ClampTec® Closures utilize proven Fire safe "All Metal" Sealing Technology with Diver and ROV operator
